Project Management

www.codeclan.com

Get the basics right

**What are your 5
basic rules for
managing a project?**

Get the basics right

- Make a thorough plan
- Break the project down
- Divide the work over several days
- Planning should happen throughout the project
- 15 doing / 10 fixing / 5 break
- Make a new goal for each goal accomplished
- Speak to each other!

A project lifecycle?

Plan

Think about
how it will look
in your head

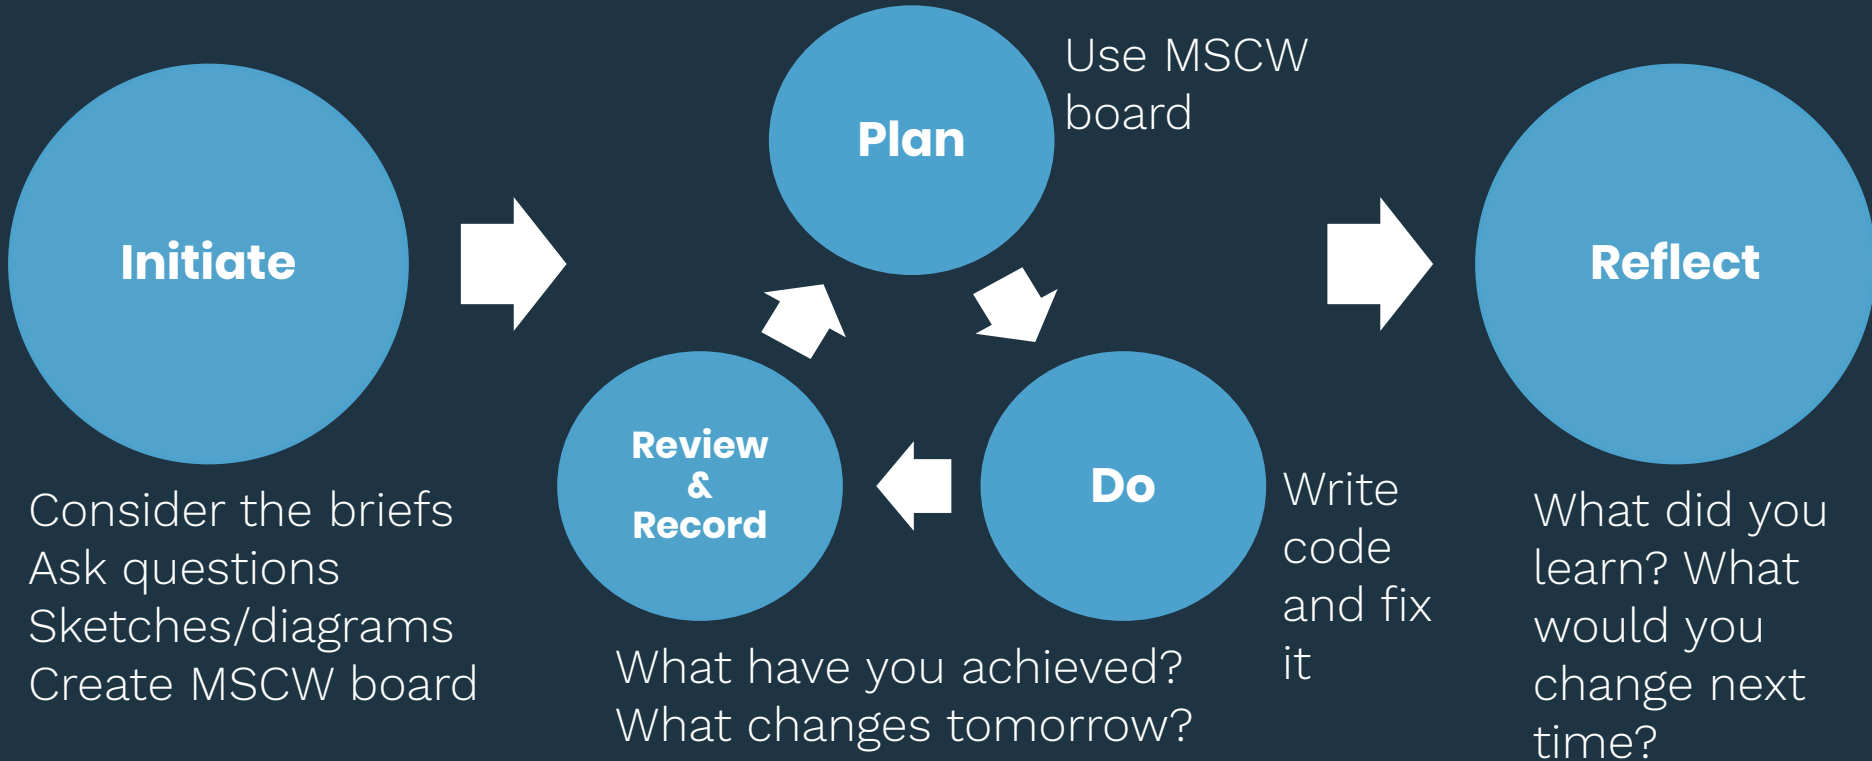

Do

Write all the code

Done

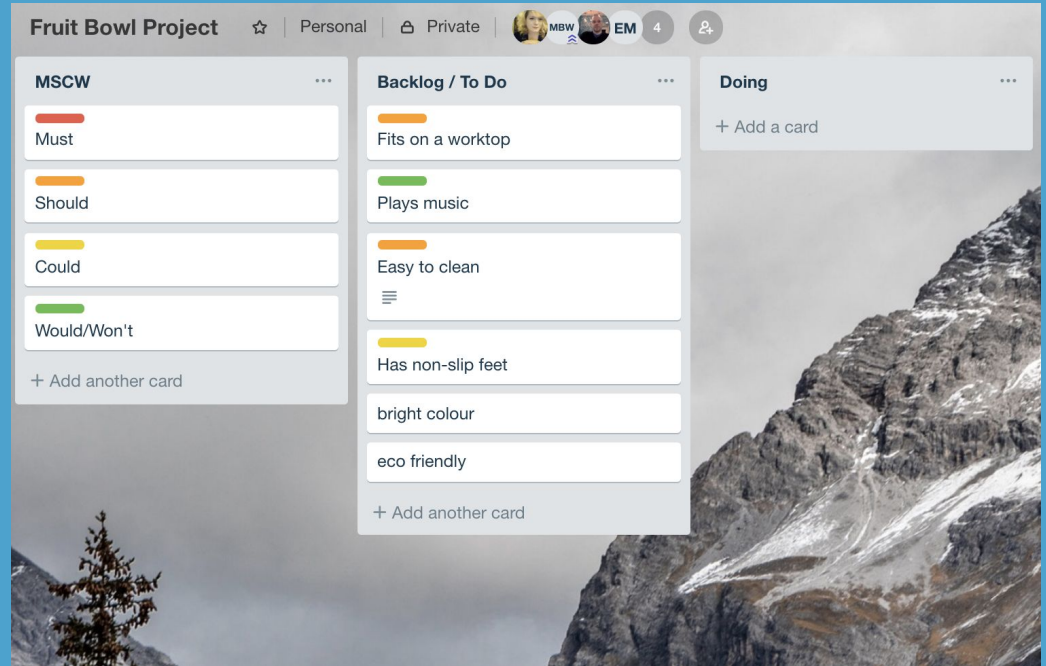

Walk away and
forget about it

A better project lifecycle

An example of how to use Trello

<https://trello.com/b/AMdfEkgs/fruit-bowl-project>

What happens when...

In pairs, think up 3 obstacles you might encounter during your project.

What happens when...

For one of your obstacles, come up with as many ways as possible that a person might deal with this obstacle.

What happens when...

Tell us about a time you overcame a challenge while working on a project...

Which of these strategies do you want to be able to talk about?

What happens when...

... you have the opportunity to model behaviours that will help you get a job soon?

Problem Solving: A Cheat Sheet

01. Understand the problem
02. Plan your attack
03. Break it down
04. Stuck? Debug and BBBB
05. Practice makes perfect
